BIOGRAPHICAL SKETCH

Provide the following information for the Senior/key personnel and other significant contributors in the order listed on Form Page 2. Follow this format for each person. **DO NOT EXCEED FOUR PAGES.**

NAME
April Barbour, MD, MPH, FACP

POSITION TITLE
Associate Professor of Medicine

eRA COMMONS USER NAME (credential, e.g., agency login)

EDUCATION/TRAINING (Begin with baccalaureate or other initial professional education, such as nursing, include postdoctoral training and residency training if applicable.)

A. Personal Statement

Several years ago, I was approached by the George Washington Cancer Institute to discuss development of a Survivorship Clinic for the adult survivors of pediatric cancers in the Division of General Internal Medicine (DGIM). This population has many unique challenges to care and it was clear to me that primary care was a natural home for survivorship care that focused late and long term effects as these patients transitioned from a pediatric practice to an adult practice. This idea intrigued me, and thus began my interest in the integration of Primary Care in the cancer care continuum, specifically as it relates to survivorship care. The Thriving after Cancer Clinic at George Washington Medical Faculty Associates (GW MFA) is a multidisciplinary clinic comprised of faculty from Children’s Medical Center, general internists/nurse practitioners, social workers, dieticians, neurologists and psychiatrists. Each patient receives an individualized Survivorship Care Plan (SCP) with evidence based guidelines for follow up of late and long term effects and appropriate referrals are made based on the patient’s current symptoms.

Two years ago, the clinic was expanded to include all cancer survivors, regardless of when they were treated. The same model was applied to the Adult Survivorship clinic and all patients seen in the clinic were given a Survivorship Care Plan and seen by a generalist (MD or NP) and a dietician during the visit and subsequent referrals or testing is arranged prior to leaving clinic. Our clinical focus in the next year will be in collaboration with our oncology colleagues to provide SCPs within 6 months to all patients completing treatment at GW MFA. Currently there at 120 new cases of cancer diagnosed each month at George Washington University Hospital.

Given the growth in the clinical arena and the opportunities for collaboration with our oncologists for research, hiring a primary care physician with an interest in cancer prevention and survivorship to direct the efforts seemed wise. My goal is to create the necessary infrastructure to provide high value clinical care and construct a database that will allow for us to begin answering some of the questions regarding survivorship care.

B. Positions and Honors

Positions:
2006- Program Director, Primary Care Residency
George Washington University
2008- Division Director, General Internal Medicine  
Medical Faculty Associates  
George Washington University  

Memberships:  
1995- American College of Physicians  
2003- Society of General Internal Medicine  
2002- Alpha Omega Alpha  

Honors:  
2001 Fellowship in American College of Physicians-American Society of Internal Medicine  
2002 Alpha Omega Alpha, Medical Honor Society  
2002 Dean’s Teaching Award, Emory University School of Medicine  
2002 Teaching Attending Award, Emory University, awarded by the chief residents  
2011 Clinic Teaching Attending Award, George Washington University, Internal Medicine Residency,  
2011 Sol Katz Teaching Award, DC ACP Chapter  

C. Selected Peer-reviewed Publications/Scholarly activity  
Thriving After Cancer: A Sustainable Long-term Multi-disciplinary Survivorship Clinic for Adult Survivors of Pediatric Cancer.  
Cancer survivorship: A needs assessment for curriculum development in resident education. Chi Kim, MD, Jessica Logan, MD, Gabriel Rivera, MD and April Barbour, MD Presented as a poster, Society of General Internal Medicine National Meeting, May 2012  
American Cancer Society Colorectal Cancer Survivorship Care Guidelines Khaled El-Shami, MD, PhD, George Washington University, Washington, DC, 2015  
Kevin C. Oeffinger, MD, Memorial Sloan-Kettering Cancer Center, New York, NY  
Nicole L. Erb, BA, American Cancer Society, Atlanta, GA  
Anne Willis, MA, The George Washington University Cancer Institute, Washington, DC  
Jennifer Bretsch, MS, CPHQ, American Society of Clinical Oncology, Alexandria, VA  
Mandi L. Pratt-Chapman, MA, The George Washington University Cancer Institute, Washington, DC Rachel Cannady, BS, American Cancer Society, Atlanta, GA  
Sandra L. Wong, MD, MS, University of Michigan, Ann Arbor, MI  
Johnie Rose, MD, PhD, Case Western Reserve University School of Medicine/Case Comprehensive Cancer Center, Cleveland, OH  
April Barbour, MD, MPH, FACP, George Washington University, Washington, DC  
Kevin Stein, PhD, American Cancer Society, Atlanta, GA  
Katherine Sharpe, MTS, American Cancer Society, Atlanta, GA  
Durado D. Brooks, MD, MPH, American Cancer Society, Atlanta, GA  
Rebecca L. Cowens-Alvarado, MPH, American Cancer Society, Atlanta, GA  

D. Research Support:  
Evaluating Cancer Survivorship Models, PCORI grant funded, 2013  Co-investigator
