Dr. Bernadette Sheridan M.D. F.A.A.F.P

Dr. Bernadette Sheridan has more than 30 years of experience in Family Practice. Throughout her career she has always sought to find a balance between career goals, family and self-fulfillment. Her goal has been to build from this foundation a practice that will continue to serve more people and families that need help, in a manner that will lead to disease prevention, early detection, disease management, patient empowerment and a healthier population.

Dr. Bernadette Sheridan proudly claims to be a Native New Yorker. Born of Caribbean parents, after completing secondary education in New York City, she received her undergraduate degree in Natural Sciences and Romance Languages from the Johns Hopkins University in 1975. Four years later she was awarded the M.D. degree from the State University of New York at Buffalo. She is a Diplomate of the American Academy of Family Practice, with affiliations at the State and Local levels. She has been the recipient of Castle Connolly's Top Doctors consecutively from 2006 thru 2015.

Dr. Sheridan was a member of a three doctor Family Practice group that has provided comprehensive care to the community for the past 15 years. In an area where many physicians come to train, go on to specialize and leave the community, this group of Family Doctors was among those who made the decision to stay. Many of the patients that she cared for while doing her training as a House Officer are still her patients in 2016.

In 2002, she launched Grace Family Medical – a Multi Specialty- Family Practice that continues to serve the families of Brooklyn and beyond.
