Source of data: HCC members in participating countries submitted photos of product packaging between Jan 2016 and August 2016. In some cases, this has not been independently verified by the HCC. International Sugar-Sweetened Soft Drink Data from survey by [Action on Sugar UK](#)

Serving Size: Actual and average serving sizes are presented for products. An average was used to facilitate product comparisons as serving sizes vary considerably between products. The average serving size used is 330mL based on work done by [Action on Sugar UK](#).

¹Recommended Daily Maximum Intake Children: For children 2-18 years, the American Heart Association (AHA) recommends a maximum daily intake of added sugars of 25g.

²Recommended Daily Maximum Intake Adults: For adults, the WHO recommends reducing the daily intake of free sugars to less than 10% of total energy intake (strong recommendation) or 50g. [The WHO recommends a further reduction of the daily intake of free sugars from 10% of total energy intake (50g) to below 5% of total energy intake or less than 25g to provide additional benefits.]
