# Challenges and Lessons Learned in effecting the Multisectoral Response

Competing agendas

Ownership of strategy goals and objectives

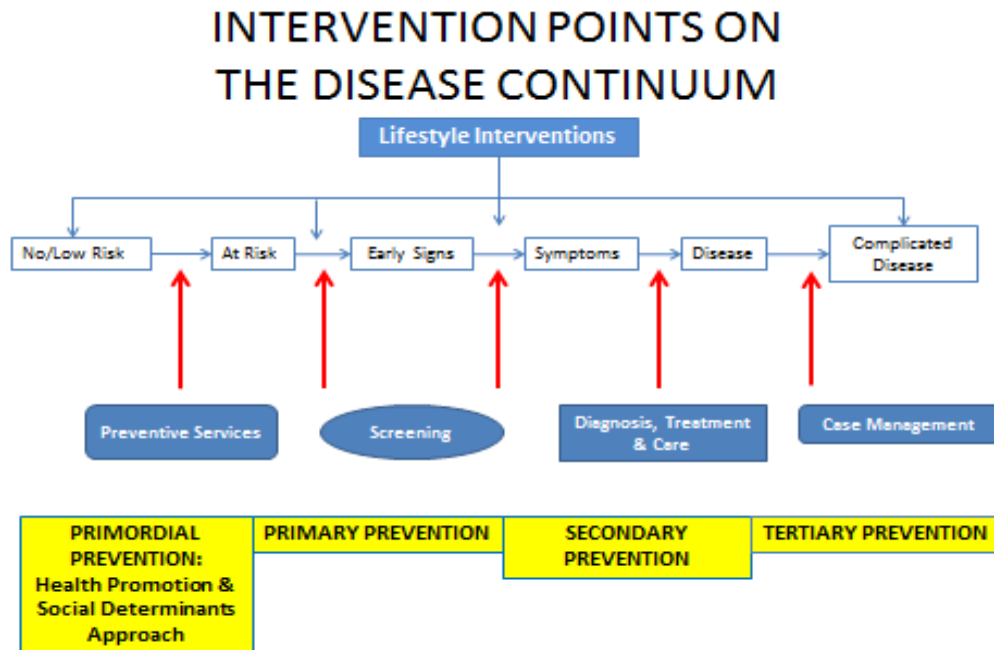

Human and financial resources

Under representation of other sectors - silo

Measuring effectiveness

# Actions Needed to achieve an enhanced multisectoral response

- ▶ January 2018
  - ▶ Symposium for Proposed National Plan to Halt the rise in Obesity and Diabetes
    - ▶ The framework of the proposed plan to address the problem based on the risk factors, the intervention points on the disease continuum, and the life course approach.
    - ▶ Framework to encourage collaboration across sectors and institutions, through an “all-of-society” approach, aimed at achieving collective systemic impact

# Actions Needed to achieve an enhanced multisectoral response

## ► Establishing National NCD Commission
