Achievements

- Opportunities to meet our mandate of:
 - Raising awareness of diabetes
 - Offering clinical care
 - Offering screening and education across communities islandwide
 - Offering Retinal Screening

Achievements

- Retinal Screening of Diabetics
- Lay Diabetes Program
- Island wide medical screening
- Life For A Child Program

Lessons learned & challenges

- Lessons learnt:
 - The impact of culture and community interactions in the management of NCDs
- Challenges/barriers
 - Sustainability of NGOs
 - Devaluation of the dollar
 - Competition from Insurance companies, Government agencies etc. threatens the very survival of NGOs

Key Points

- Given the burden of NCDs on families, communities and country up to USD422 Million,
- Increase public education and awareness on NCDs in schools and communities.

Recommendations

- Educate the public on how to make good nutrition choices. Make information readily available
- More ongoing public education
- More Health Screenings with referral and follow ups
- Better access to medication through health centers?
- Improved presence in schools and communities
- Advocacy on healthy eating habits and improving physical activities
