Awareness, Screenings, Education, and Advocacy

United Nations, NY (September 2011)
Advocacy is needed to improve the lives of patients with (or at risk for) diabetes
FHADIMAC and NCDs

FHADIMAC has an MOU (2010) with the Ministry of Health (MSPP) in which it is recognized as the reference institution in the management of Diabetes and Cardiovascular diseases in Haiti.

Since then, we have been advocating to move forward the cause of NCDs and put the pressure on the MSPP to create a task force (January 2018) and have NCDs in their agenda.
Training, Standardized protocols, and Educational materials
En Haïti, 52% des enfants en coma diabétique meurent.
Aucun enfant ne devrait mourir du Diabète
