A CIVIL SOCIETY CALL TO URGENTACTION

FOR THE CARIBBEAN REGION TO ACCELERATE NUTRITION POLICIES FOR THE CREATION OF HEALTHY ENVIRONMENTS FOR CARIBBEAN CHILDREN

Arising out of a multisectoral regional meeting "Accelerating **Nutrition Policies in the Caribbean: Creating Supportive Environments for Healthy** Children", 17-18 September 2019¹ in Bridgetown, Barbados, the Board of Directors and the Members of the Healthy Caribbean Coalition (HCC), are calling for the urgent acceleration of nutrition policies in the Caribbean to create healthier food environments and address the epidemic of overweight and obesity among Caribbean children².

THE CALL The HCC is calling on the

Caribbean region to work across sectors in partnership to achieve the urgent implementation of the following

3 PRIORITY NUTRITION POLICIES

MANDATORY 'HIGH IN' FRONT OF PACKAGE **NUTRITION WARNING LABELLING** to empower consumers to make healthier food choices.

BANNING THE SALE AND MARKETING OF SWEET BEVERAGES IN SCHOOL SETTINGS and ensuring the availability of free drinking water to reduce the consumption of these beverages among children.

TAXATION OF SWEET BEVERAGES of at least 20% to reduce the consumption of these beverages among children.

Although the HCC recognises that a holistic package of policy interventions is needed to effectively address overweight and obesity as identified in the WHO Report of the Commission on Ending Childhood Obesity Implementation Plan: Executive Summary³, the PAHO Plan of Action for the Prevention of Obesity in Children and Adolescents⁴ the CARPHA 6-Point Policy Package and the HCC Civil Society Action Plan 2017-2021: Preventing Childhood Obesity in the Caribbean (CSAP)⁵, it is critical to prioritize.

THE HIGH-LEVEL COMMITMENT TO ADDRESS THE PROBLEM

CARICOM Heads of Government and State have acknowledged the scale and severity of the problem and the need for an urgent response.

2016

37th Regular Meeting of CARICOM Heads of **Government and State**

2017

38th CARICOM Summit, on the 10-year anniversary of the Port of Spain Declaration, Heads of Government and State

2018

39th Summit, CARICOM Heads of **Government and State**

KEY ACTIONS ACROSS SECTORS

Against the background of the above, the HCC is calling on the following key actors to play their respective roles:

We recognise the primary responsibility of governments as the custodians of public health and

CALL ON THE CARICOM

Move beyond the rhetoric and 'WALK THE TALK' by fulfilling stated high-level commitments to tackle childhood obesity.

Support the establishment and strengthening of NATIONAL NCD COMMISSIONS to play their role in achieving multisectorality.

A pledge was made "to address issues such as banning advertisement of potentially harmful foods which specifically target children; and elevating taxes on foods high in sugar, salt and trans-fats".

"Noted with concern that obesity in children represented the greatest threat to the health of future generations with the level of overweight and obesity being more than 30% in both primary and secondary school populations in many Member States".

Endorsed a number of priorities for the 3rd **UN High Level Meeting** on Noncommunicable Diseases (NCDs) including: "implementing policies geared to preventing childhood obesity, including health-promoting school environments and Front of Package (FOP) labelling".

POLITICAL LEADERSHIP TO:

Work with regional and international partners to build the technical capacity in key ministries (including health, education, trade, finance, agriculture, and commerce) and ensure POLICY COHERENCE.

Work with regional and international partners to **BUILD THE CAPACITY** of governments to design, implement, enforce, and monitor policies, and enact supporting legislation and regulations.

SAFEGUARD NUTRITION POLICY and wider

public health from private interests through the implementation of processes to manage, and avoid where possible, conflicts of interest and counter industry interference and obstruction in healthy nutrition policy development.

THE CONTEXT

UNHEALTHY DIET is one of the major modifiable risk factors for NCDs and the **PRIMARY CONTRIBUTOR TO OVERWEIGHT AND OBESITY.**

Unhealthy diets alone pose a greater **RISK TO MORBIDITY AND** MORTALITY than do unsafe sex, alcohol, drug, and tobacco use combined⁶.

> Small Caribbean states are particularly vulnerable and urgent action is needed in this region to dramatically shift diets away from unhealthy ultra-processed foods towards HEALTHIER, 'REAL' FOODS.

In the fast tracking of these policies the following must be REMEMBERED:

1

4

7

development.

Childhood overweight and obesity is a SOCIAL JUSTICE **ISSUE** and represents at its core a violation of "the right of the child to the enjoyment of the highest attainable standard of health" under Article 24 of the United Nations Convention on the Rights of the Child⁷. All CARICOM Member States have ratified this CONVENTION.

2 It is vital to view the issue of childhood obesity and the need to urgently implement policy solutions through a **RIGHTS-BASED** lens, one which acknowledges that the current environment in which children are conceived, born and grow is inherently obesogenic and consequently places them on a trajectory for unhealthy weights and early onset NCDs from the womb.

Policies with populationlevel impact are required to modify the food system and **CREATE ENVIRONMENTS IN** WHICH HEALTHY CHOICES ARE EASY CHOICES and the major responsibility for such choices shifts towards governments and away from individuals.

Governments are ultimately responsible for creating the environments that ensure the **HEALTH** AND WELLBEING **OF THEIR CITIZENS COMES FIRST.**

3

6

There is clear **EVIDENCE**

both from within and outside

of the region to support the implementation of these

policies as effective tools to

making healthier choices.

There is need to identify

and leverage LINKAGES.

those linkages.

CO-BENEFITS AND SYNERGIES

across other key issues such as

of resources available through

climate change, taking advantage

modify behaviours towards the

consumption of healthy foods and

COMMIT TO:

WE AS CIVIL

SOCIETY

SUPPORT cross-country sharing of experiences in policy development, implementation, and monitoring.

SUPPORT the multisectoral effort aimed at improving nutrition in the Caribbean.

CONTRIBUTE to strengthening surveillance

systems to ensure data for monitoring. BUILD CAPACITY for civil society actors to advocate for healthy nutrition policies.

PRESSURE governments to be transparent in their processes.

> SHARE and make easily accessible **evidence** for

policy action.

PROTECT the **policy process**

by identifying and highlighting instances of conflict of interest, industry threats or interference, and the undermining of the policy development process.

PROMOTE the formation of National NCD Alliances and/or **Childhood Obesity Coalitions** to support the amplification of voices through collaboration.

WORK with partners to implement national and **regional** awareness campaigns in order to create strong social movements supportive of healthy nutrition policies.

HOLD political leadership accountable to their commitments publicly through various strategies, including open letters.

PLAY A WATCHDOG role and monitor progress towards, and post, policy implementation.

5

A multisectoral, whole-ofgovernment and whole-of**society approach** is fundamental and must be at the centre of this work to ensure POLICY **COHERENCE** across sectors and policy success.

Citizens must be provided with

improve their health and nutrition

the justification for relevant policy

literacy, and to better appreciate

ACCESS TO INFORMATION to

8

diets away from ultra-processed foods high in fats, sugars, and salt, towards healthy food from sustainable food systems.

A FOOD SYSTEMS APPROACH is

required to reorient Caribbean

Governments, the main duty bearers in the rights-based approach, must establish TRANSPARENT AND ACCOUNTABLE GOVERNANCE SYSTEMS.

9 Systems must be put in place to identify and manage conflicts

of interest, counter industry obstruction, and, ultimately, SAFEGUARD NUTRITION POLICY and the health of the region's children.

We recognise the role and influence of the food and beverage sector and CALL ON THE PRIVATE SECTOR TO:

Commit to **SUPPORTING THE MULTISECTORAL EFFORT** aimed at improving nutrition in the Caribbean.

Adopt inclusive business models that complement policies, legislation, and regulations that ENABLE HEALTHY FOOD ENVIRONMENTS.

Hold the food and beverage sector accountable for RESPECTING THE RIGHT OF CHILDREN TO ACCESS HEALTHY FOODS AND BEVERAGES, including:

- Halting the sale and marketing of sweet beverages in school settings and other settings where children frequent.
- Halting interference with evidence-based, effective nutrition policy, in particular taxation of sweet beverages and front of package labelling.

Recognise and manage the INHERENT CONFLICT OF INTEREST as it relates to the food and beverage sector, specifically:

TAX

+20%

- Avoid sitting on the boards of companies or entities involved in nutrition policy development.
- Avoid entering into contractual arrangements with institutions (especially in school settings) to provide unhealthy foods or beverages.
