1 in 3 Caribbean Children is overweight or obese

Fueled by unhealthy diets linked to the over consumption of ultra-processed foods

EXCESS SUGAR CONSUMPTION is a major cause of overweight and obesity

Sweet beverages are the primary source of sugar in the diets of Caribbean children and adolescents

66% of Caribbean children 13-15 drank carbonated soft drinks one or more times per day during the past 30 days. These drinks are ultra-processed, energy-dense and nutrient-poor

POTENTIAL RISKS

Childhood Obesity can lead to the development of Non Communicable Diseases (NCDs) in adult life

8/10 NCDs are responsible for approximately 8 out of 10 deaths in the Caribbean*

40% 40 percent of NCD deaths in the Caribbean occur prematurely before the age 70*

HCC POLICY ASKS

HEALTHY SCHOOL POLICIES

Banning the sale and marketing of sweet beverages and unhealthy foods in and around schools

TAXATION OF SWEET BEVERAGES

Imposition of a tax of not less than 20% on sweet beverages and use tax revenue for NCD prevention and control

MANDATORY FRONT OF PACKAGE NUTRITION WARNING LABELS
