Nutrition and Youth Advocacy

THE FUTURE TALKS: COVID-19 AND NCD'S IN THE CARIBBEAN
Education is the most powerful tool to change the world

NELSON MANDELA
To promote sustainable and equitable community development through research and educational programs for orphans and vulnerable children and adolescents, that facilitate their integral development and identification of their life purpose.
Millions of children and adolescents in Mexico between 5 and 11 years old suffer obesity and overweight. Between 1 and 14 years old have suffered some type of violence at home. Under 5 years old don't have an adequate development level. 49.6% live in poverty.
Technology-Based Learning

Develop logical mathematical thinking, creative thinking, the ability to abstract, and information management at a high level, in order to facilitate problem solving in different areas of life.

Garen-Based Learning

collaborative, expressive, reflective, self-learning and self-worth skills, critical thinking, creativity and curiosity, taking into account the individual capacities of each one.
Child care, Neurodevelopment and Wellbeing

apply techniques and tools based on the principles of behavioral modification and neurodevelopment in order to foster enriching environments for girls and boys and adolescents.

Nutrition, Health and Wellbeing

develop in the participants knowledge, skills and resources that allow them to offer healthy and tasty food and improve the diet of girls, boys and adolescents residing in Orphanages, Homes and shelters through healthy, affordable, accessible and personalized menus.
