

Webinar

'THE FUTURE TALKS' COVID-19 AND NCDs IN THE CARIBBEAN THE LEGACY

Date: Friday July 24th 2020 | Location: Zoom | Time: 10:00am - 11:30am EST

The objective of this webinar is to gain insight from youth experts who will present their professional and personal perspectives on how the region's health systems can "build back better" from the COVID experience.

Youth have a critical role in helping to shape a world where their generation and future generations thrive. The urgency to "build back better" effectively is intensified by two major global targets: the 25% reduction in premature death from the four major NCDs by 2025 and a one-third reduction in premature mortality from non-communicable diseases through prevention and treatment and promotion of mental health and well-being by 2030 (target 3.4 of the Sustainable Development Goals). The way that the world rebuilds affects youth and their voice is instrumental, especially now as we explore the COVID-19 health legacy.

The global 2025 and 2030 deadlines are approaching, the urgency is evident, and the timing is opportune - the youth experts will provide their perspectives on how the region should purposefully rebuild to ensure that "no one is left behind".
